

We do not know where these coils came from, or when exactly they came here. We do, however, think they are Mod B-1 inner and outer coil sets, and the drawings are listed below.

ME-197938	Outer, Upper
ME-197939	Inner, Upper
ME-351619	Outer, Lower
ME-351620	Inner, Lower

We do not know if these coils are electrically or physically sound, since we did not do any inspection of them.
